Who We Are

Belief

Baptist Health is more than a business; it is a healing ministry. Our healing ministry is based on the revelation of God through creation, the Bible and Jesus Christ. At Baptist Health, care of the whole person – body, mind, and spirit – is an expression of Christian faith. We are instruments of God's restorative power and are responsible for giving compassionate care.

Mission

Baptist Health exists to provide the quality patient centered services, promote and protect the voluntary non-profit healthcare system, provide quality health education and respond to the changing health needs of the citizens of Arkansas with Christian compassion and personal concern, consistent with our charitable purpose.

Vision

Baptist Health will improve the health of Arkansans by changing the way healthcare is delivered.

Values

In fulfilling our mission, we place special emphasis on the values of service, honesty, respect, stewardship, and performance.

Service

Quality service is the foundation of any successful business, and is even more essential in the provision of healthcare. Our success is dependent on each employee's desire and commitment to serve others.

Honesty

Adherence to the moral values of fairness, integrity and honor in all relationships is a major priority.

Respect

All people are to be treated as individuals, with courtesy and thoughtfulness. Respect for each person's dignity and worth is essential. Patients are to be treated with concern and compassion.

Stewardship

We prudently commit our resources, using our talents and strengths in an effective and efficient manner. Our facilities and equipment are maintained with pride.

Performance

Desired characteristics of volunteers include initiative, dedication, talent, and knowledge tempered by common sense. The highest possible performance from all is expected.

HIPAA & Confidentiality

HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT

The HIPAA legislation sets a national standard to protect an individual's personal health information and requires us to take responsible precautions to protect against unauthorized uses or disclosures of a patient's personal health information. Any information that could be traced to or identified with a particular patient could be construed as a personal health information violation.

Personal health information may be found on such items as: medical charts, prescriptions, identification bracelets, and meal descriptions.

Special care must be taken to protect and where necessary destroy anything that identifies a patient's name, address, social security number, date of birth, age, medical history, diagnosis, and lab results.

Under HIPAA, healthcare facilities must give patients a written notice of their privacy practices and patient's privacy rights.

Wrongful disclosure of personal health information and non-compliance with requirements can result in fines, termination, and/or imprisonment.

Medical records are confidential and protected by law. Even the fact that a patient is hospitalized may itself be confidential information. Records may include information about a patient, family member, a healthcare professional or items of a sensitive nature. Volunteers are held to the same standard as employees and must agree to never discuss any patient's condition, reveal, copy, fax or in any manner disclose the contents of the medical record of any patient who has, is or will receive healthcare services through Baptist Health. Breach of this trust is grounds for immediate and irrevocable dismissal.
