4	12th						

## 2nd Four Weeks

Week	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
5	19th						
6	26th						
7	4th						
8	March 11th						

# CHALLENGE RULES

Record each day with a mark. If you were successful with meeting your habit requirement for that day then write down an O, if you were not put an X. Shoot for a success percentage of 80% per week. Meaning if you meet your water intake 5 out of the 7 days for that week, you were successful 80% of the time. Of course the more successful days you have the better you'll feel, and the better off you'll be at developing a healthy habit. The goal is to accomplish the listed habits each day for each week, if you accomplish one habit, but not the others listed for that day then mark an X. It won't be easy hence the word CHALLENGE, however every positive habit you develop is a step closer to a healthier you and in 30 days you will notice a difference in how you look, move, and feel. Good Luck!
